PROJECTS

E-dental Care -- Website

'E-dental care' is a website which meets all the requirements of a dental clinic and to help the dentist in managing their clinics in an effective manner. It develops online booking system for real dental clinic. It allows user conveniently to book their appointments. This website can process the booking through any internet connected device such as PC, mobile, phone, and laptop. It allows user in selecting date, time and then confirm booking without any manual intervention. Since the clinic is on the path of growing; traditional booking cannot help in catching up business growth.

Flower Shop -- Website

The flower shop's purpose is to provide our customers with quality flowers and floral arrangements at a fair price. We will strive to match and surpass the expectations that our customers expect from us and our products. We will not compromise on quality and will never use inferior product for the sake of price.
